PakEnergy

Dynamic Enterprise Land Management Software

Connect Field & Back Office With Instant Infrastructure

Manage Data & Increase Efficiencies in One System

Identify & Mitigate Risks Quickly & Effectively

Leverage Data & Analytics to Inform Smart Decisions

PakEnergy, LLC | A Delaware LLC

Unite Your Land Teams, Reduce Risks & Keep Owners Happy

Don't let the big disconnect between land and lease records keep your team from unleashing its full potential. PakEnergy Land connects landmen in the field with back office lease reords, division order and owner staff in real-time. The system powers a new level of efficiency from initial broker deal capture and lease acquisition through asset onboarding, payments and owner management.

The system's user-friendly interface gives your teams the confidence to outperform. It simplifies lease data entry for landmen and ensures lease records are complete, resulting in more teamwork and less rework.

PakEnergy Land's comprehensive system gives you everything you need out of the box to maximize land productivity, whether you're a startup or managing thousands of wells.

- Lease Records Database
- 100+ Pre-Built Workflows
- Shut-In Well Alerts
- Broker Data Capture
- Cloud-Based Mapping
- Owner Relations CRM
- Powerful API Integrations

> " PakEnergy was our go-to choice for land management because of the ease of use and knowledgeable team. We feel like PakEnergy really understands our needs.
