OnPing
powered by PakEnergy

Get everything you need from your sites and devices.

Up to the Minute Sensor Data & Control

Calculated Values & Automated Reporting

Comparative Trends & Visualizations

User Customizable Dashboards & HMIs

PakEnergy, LLC | A Delaware LLC

Bring Your Entire Field into View Across Your Enterprise

OnPing is PakEnergy's SCADA and IOT platform. OnPing delivers the huge cost savings and convenience of cloud-based software-as-a-service with user customization previously possible only with on-premises software.

OnPing helps you reduce costly downtime on wells and minimize unnecessary visits to remote sites. This powerful system works seamlessly with Pak Production to deliver timely, reliable data analytics and allows you to monitor and combine data from any equipment in your operations field.

- **Alarming via voice, text & email**
- **Up to the second data polling**
- **Rich graphic custom HMI**
- **Automated data reports & charts**
- **Custom alarming & logging**
- **User changeable set points & controls**
- **Automated, formatted reports**
- **24-7 Support**

> **One of the things I really love about OnPing is that it provides ALL the answers for how to get data in, instead of just a couple.**
