Collaboration

Increase Speed
& Accuracy

PakEnergy, LLC | A Delaware LLC

Connect & Empower Your Field & Back Office Teams

PakEnergy Production connects the energy field and back office in real-time, delivering unmatched value starting at flowback through the decline curve and covering all field activities, from run tickets and well tests to compliance and ESG.

This easy-to-use software comes with a mobile app your field team will love with “no data left behind” features. The app walks field staff through their lease assessment and validates pumper data entry before sending field data to the cloud.

PakEnergy Production’s web-based dashboard, point-and-click charts, and report library allow your back-office team members to stop chasing data and redirect their time to high-value production optimization.

Mobile App + Offline Mode

Well Events, Tests, Run Tickets

Daily Allocations

AI Pump by Exception

SCADA Data Integration

Production & Downtime Dashboard

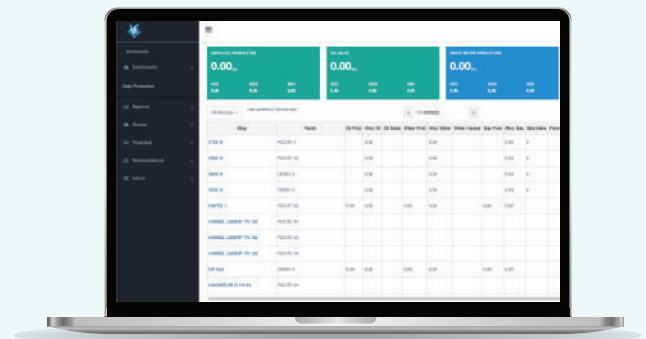

Automated Partner Reports

State/Federal Reports

“ Superior at every level, we felt PakEnergy had the best looking product, cleanest data presentation, and the support staff to customize our experience.

-Engineering Manager, Eagle Ford Operator

PakEnergy Production delivers enterprise oilfield tech solutions to empower teams, protect assets, keep owners happy, and restore your peace of mind – all in one easy-to-use solution.

Field Data Capture

Eliminate Data Wrangling

- Capture & validate well and facility production
- Blend SCADA streams with pumper data entry
- Access evergreen, decision-ready production KPIs

Multi-Tier Allocations

Allocate with Confidence

- Run multi-tier allocations in minutes
- Capture days on, percentage, flat amount, volumes, wells or product

Well Route Optimization

Hit Production Targets

- Eliminate fixed well routes to focus on priority wells
- Reduce downtime with rule-based pump by exception
- Utilize available AI-optimized well routes

Field Ticket Management

Drive Financial Visibility

- Eliminate paper-based run ticket management
- Centrally manage electronic field tickets
- Accelerate production accounting & financial reporting

Report Library

Automate Production Reporting

- Leverage pre-built dashboards, downtime & other report types
- Create custom reports
- Self-service reports to keep partners happy

Regulatory Reporting

Simplify State & Federal Reports

- Link multiple data sources for automated reporting
- Create state reports with just a few clicks
- Meet new ESG/emissions reporting requirements

Software-as-a-Service

Affordable SaaS Solution

- Enjoy production software delivered over the web
- Push the “easy button” for painless, all-inclusive setup
- Get continuous & no hassle upgrades

Extend PakEnergy Production

PakEnergy Accounting, Land, Exchange, and Intelligence products allow you to:

- Organize & search well files
- Give owners self-service reporting
- Integrate with accounting & land
- Turn data into business intelligence
